Selected opportunities

Boston area opportunities | October 20, 2026

01 Trivium Interactive - Graphic Design Intern

Boston, MA / Onsite | $18/hour | 20-25 hours/week

October-December 2026, with possible extension. Design interface screens for interactive exhibits at museums and visitor centers. This role interests me because it combines typography, layout, and web design with visual storytelling. Requires experience with Adobe Photoshop, Illustrator, InDesign, and Figma.

Employer listing and application details

02 Watts - Graphic Design Intern, Summer 2027

North Andover, MA / Hybrid | $21-$23/hour | Full-time internship

Create product imagery, infographics, and digital commerce assets within Watts brand standards. I am interested in how a brand system carries across different products and platforms. This internship would let me apply my branding, photography, and web design experience to that work.

Employer listing and application details

03 marlo marketing - Junior Graphic Designer

Boston, MA | Pay not listed

Design branding and print, digital, and social materials for consumer lifestyle clients. I am drawn to the range of brand applications and the opportunity to develop ideas across different media. The position asks for 2-4 years of post-college design experience.

Employer listing and application details

Elevator pitch

Hi, I'm Oleg Yershov, a graphic design student at UMass Lowell working across branding, web design, and photography. I enjoy developing brand identities through conceptual visual storytelling, from a hearing protection campaign that reflects my personal experiences to an interactive personal portfolio website that adapts to different screen sizes. I'm looking for a design opportunity where I can bring that mix of concept and execution to a creative team. How does your team approach projects that combine storytelling and digital design?

Re: Graphic Design Intern, Summer 2027

Dear Watts Hiring Team,

I am applying for the Summer 2027 Graphic Design Internship at Watts. I am a graphic design student at the University of Massachusetts Lowell and will graduate in 2028. My work includes branding, web design, and photography. I am especially interested in how typography, imagery, and layout work together to create a consistent brand. This internship interests me because I would be able to explore that through product graphics, infographics, and website content.

I developed a hearing damage awareness campaign, developing a visual identity that used a combination of emotionally-driven headlines and a unique portrayal of sound to draw attention to hearing damage. My goal was to promote hearing protection through my personal experience with hearing damage. This project helped me understand how branding can make a complex topic easier to understand, which I would like to apply when creating product content at Watts.

I also designed and developed a responsive website for my photography business. I created the branding and brought it into an interactive portfolio, paying attention to how the images and layouts appeared on different screen sizes. This experience helped me learn how to keep a brand consistent while adapting it to different formats. I would use that approach when working on graphics for retailer and distributor websites.

My print projects include multi-page pieces that combine photography and design, as well as a book about the psychology of brand identity. Through these projects, I have become more interested in the systems behind a brand. I enjoy working out how type, color, and images can connect different pieces while giving each one a clear purpose. I would be excited to build on this interest and learn from the marketing team at Watts.

Thank you for considering my application. I would welcome the opportunity to share my portfolio and discuss how my design experience and interest in branding could contribute to your team.

Sincerely,

Oleg Yershov
